Yurui Tang

Ph.D. Candidate · Graph Theory

School of Mathematics, East China Normal University, Shanghai, China

tyr2290@163.com | 52290155027@stu.ecnu.edu.cn | ORCID: 0009-0008-7220-7883

Research Interests

Structural graph theory and extremal graph theory, with particular interests in Hamiltonicity, cycles and paths, subdivisions in graphs, Turán-type problems, graph expansion, and regular graphs.

Education

2023–2028 **Ph.D. in Operations Research and Cybernetics** (expected 2028), East China Normal University, Shanghai, China.

2019–2023 **B.S. in Applied Mathematics**, East China University of Science and Technology, Shanghai, China.

Publications

Published papers

1. **The maximum number of cliques in graphs with given fractional matching number and minimum degree**
   Chengli Li, **Yurui Tang**
   Discrete Applied Mathematics 379 (2026), 390–399. DOI

2. **Sparse graphs with an independent or foresty minimum vertex cut**
   Kun Cheng, **Yurui Tang**, Xingzhi Zhan
   Discrete Mathematics 349 (2026), 114658. DOI

Preprints and manuscripts

2026

3. **Nonhamiltonian regular sublinear expanders**
   Chengli Li, **Yurui Tang**
   Preprint, 2026. arXiv:2608.26718

4. **Characterizing forbidden induced subgraphs that force top vertices to be Gallai vertices**
   Yurui Tang
   Preprint, 2026. arXiv:2608.12848

5. **Weakly pancyclic vertices in dense nonbipartite graphs**
   Yurui Tang, Xingzhi Zhan
   Preprint, 2026. arXiv:2601.15822

6. **On the large-clique version of the Erdős–Sós conjecture**
   Kun Cheng, **Yurui Tang**
   Manuscript, 2026.

2025

7. **Extending two results on Hamiltonian graphs involving the bipartite-hole-number**
   Kun Cheng, **Yurui Tang**
   Preprint, 2025. arXiv:2511.16099

8. **The circumference of a graph with given minimum degree and clique number**
   Na Chen, **Yurui Tang**
   Preprint, 2025. arXiv:2510.26233

9. **Cycles and paths through vertices whose degrees are at least the bipartite-hole-number**
   Chengli Li, Feng Liu, **Yurui Tang**
   Preprint, 2025. arXiv:2506.09750

10. **The minimum size of a k-connected locally nonforesty graph**
    Chengli Li, **Yurui Tang**, Xingzhi Zhan
    Preprint, 2025. arXiv:2501.13980

Invited Talks

The minimum size of a k-connected locally nonforesty graph — **Huaibei Normal University**
Joint work with Chengli Li and Xingzhi Zhan — Anhui, China

Research Profile

- Hamiltonian-type problems, circumference, pancyclicity, and degree conditions for cycles and paths.
- Extremal and structural problems concerning subdivisions and spanning structures.
- Generalized Turán problems, clique counting, forbidden trees, and related extremal questions.
- Expansion in regular graphs and extremal constructions for long-cycle and Hamiltonicity problems.
